GoDEX AG4000T Series Print-and-Apply Systems

low-cost print-and-apply

GoDEX AG4000T systems combine powerful ZX1000i or ZX1000Xi printers with an industrial tamp alliclicator to offer cost-effective print-and-apply solutions.

Labels are printed at 200, 300 or 600dpi resolution and applied using a tamp applicator with a choice of label pads for different label sizes and product types.

AG4000T systems can be installed to label the top or side of products.

Depending on the label pad type, stationary or moving products can be labelled.

Specification	AG4000T / AG4000T-LS
Printer:	GoDEX ZX1000i and ZX1000Xi series
Print method:	Thermal transfer or direct thermal
Print resolution:	200, 300 or 600dpi
Standard label pad sized:	60 x 60mm and 100 x 100mm
Optional label pad sizes:	From 20 x 20mm to 110 x 200mm
Tamp stroke:	400mm overall / 270mm effective (AG4000T) or 500mm overall / 370mm effective (AG4000T-LS)
Label roll size / ribbon length:	Label roll 200mm OD (260mm with optional external holder) / Ribbon length 450m
Max. throughput:	60 labels/min depending on label size and tamp stroke length
Standard interfaces:	Ethernet, USB and serial
Optional interfaces:	WiFi, Bluetooth and parallel
Warranty:	Applicator 3 years / printer 5 years (excluding wear parts)
Options:	Custom label pads (standard tamp, self-levelling tamp and roll-on types), custom floor stands, integrated conveyors, stand-alone kit, status beacon, inline barcode reader or vision system with reject station, various software and integration options, dual control terminal.
